

Test The Teacher

Always wondered what kind of teacher you are?

Using the state of the art XIMPEL framework, this innovative prototype sketches plausible real-life situations that can occur during your teaching period. You as a teacher will assess these situations and reflect on them. Finally, decide which reaction would be closest to your own and let the application do its job.

Which results can I expect?

Via the scoring system implemented in the prototype, your given answers are assessed and based on these the most fitting teacher type will be the result.

What is XIMPEL?

Excellent question! XIMPEL is an open multimedia platform that can be used for both entertainment and education. Using images, film fragments, gifs and text the creator can fully express himself and make the interaction even more interactive.

How can Test The Teacher help you?

Evaluating scenarios does not only help you prepare for certain situations, but it also provides insight on how you would react. Your first reaction might not always be the most optimal one given the circumstances. Using Test The Teacher, you will be able to reflect on your initial reaction and evaluate the provided alternatives, thus enhancing your teaching methods.

Take away message

In the end, teaching should be about the children and motivating them to learn. Evaluate your teaching skills via Test The Teacher and allow it to help you make improvements where needed.
